General Information

Features

Your DVD Micro Theatre with 5.1-channel full digital amplifier creates the same dynamic sound qualities that you find in full-fledged cinemas and incorporates some of the best features in home theater technology.

Other features include:
Built-in DTS and Dolby Digital decoder, supporting Incredible Surround and DSC sound setting.

Additional Component Connections
Lets you connect other audio and audio/visual components to the DVD micro theatre.

Night mode
Lets you compress the dynamic range, reducing the difference in loudness between different sounds in Dolby Digital mode.

Parental Control (Rating Level)
Lets you set a ratings level so that your children cannot watch a DVD that has a rating higher than you set.

Sleep/Wake-up Timer
Enables the system to switch on/off automatically at a preset time.

Progressive Scan
Provides high quality flicker-free images for film based sources. When a picture refreshes, its vertical resolution can double to 525 lines.

Note:
To fully enjoy the progressive scan feature, you need a progressive scan TV.

Supplied accessories

- Remote control with two AAA batteries
- AM antenna
- FM wire antenna
- 5 satellite speakers
- 1 passive subwoofer including 1 subwoofer cable
- A/V cord (R/W/Y)
- Control cable
- Stand

If any item is damaged or missing, contact your retailer or Philips.

Environmental information

All unnecessary packaging has been omitted. We have tried to make the packaging easy to separate into three materials: cardboard (box), polystyrene foam (buffer) and polyethylene (bags, protective foam sheet).

Your system consists of materials which can be recycled and reused if disassembled by a specialised company. Please observe the local regulations regarding the disposal of packaging materials, exhausted batteries and old equipment.

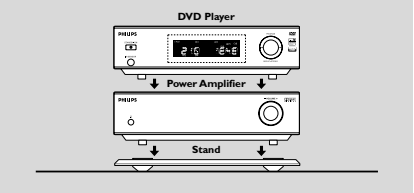
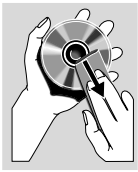
Installation

- Place the player on a flat, hard, and stable surface.



- In a cabinet, allow about 10cm (4 inches) of free space all around the player for adequate ventilation.
- Do not expose your player to extreme temperatures or humidity.
- The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquid such as vase shall be placed on the apparatus.
- No naked flame sources, such as lighted candles, shall be placed on the apparatus.
- Install this unit near the AC outlet and where the AC power plug can be reached easily.
- The ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, table-cloths, curtains, etc.

Maintenance



- When a disc becomes dirty, clean it with a cleaning cloth. Wipe the disc from the center out, in a straight line.
- Do not expose the player, batteries or discs to humidity, rain, sand or excessive heat (caused by heating equipment or direct sunlight). Always keep the disc tray closed to avoid dust on the lens.
- Do not use solvents such as benzene, thinner, commercially available cleaners, or anti-static spray intended for colour discs.
- The lens may cloud over when the player is suddenly moved from cold to warm surroundings, making it impossible to play a disc. Leave the player in the warm environment until the moisture evaporates.

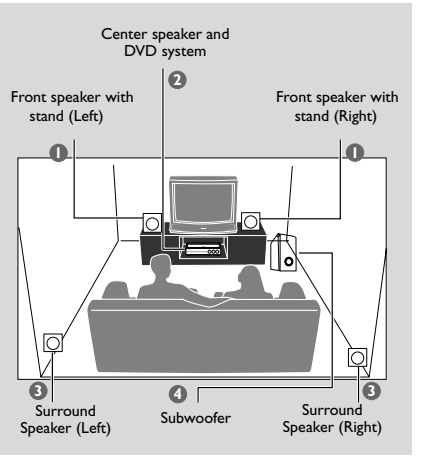
Connections

IMPORTANT!
– The type plate is located at the bottom of the system.
– Before connecting the AC power cord to the wall outlet, ensure that all other connections have been made.
– Never make or change any connections with the power switched on.

Step 1: Placing the speakers and subwoofer

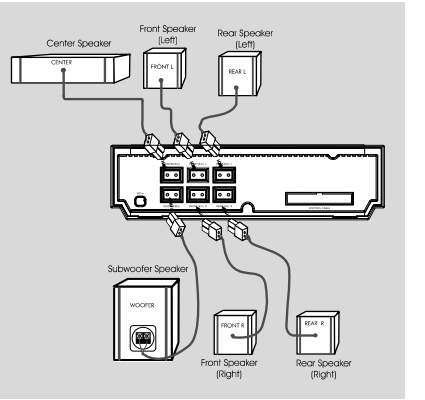


For best possible surround sound, all the speakers (except subwoofer) should be placed at the same distance from the listening position.

1. Place the front left and right speakers at equal distances from the TV and at an angle of approximately 45 degrees from the listening position.
2. Place the center speaker above the TV or the DVD system so that the center channel's sound is localized.
3. Place the rear speakers at normal listening ear level facing each other or hang on the wall.
4. Place the subwoofer on the floor near the TV.

Notes:
– To avoid magnetic interference, do not position the front speakers too close to your TV.
– Allow adequate ventilation around the DVD system.

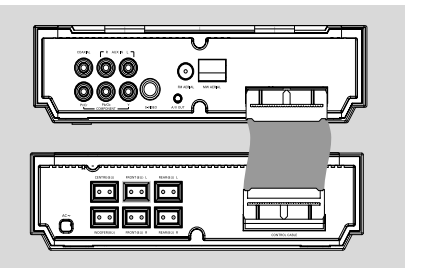
Step 2: Connecting speakers and subwoofer



1. Connect the supplied front, rear and center speakers using the fixed speaker cables by matching the colors of the jacks and speaker cable connectors.
2. Connect the passive subwoofer to the WOOFER (4Ω) terminal with the supplied subwoofer cable by matching the plug types.

Note:
– Ensure that the speaker cables are correctly connected. Improper connections may damage the system due to short-circuit.

Step 3: Connecting the control cable



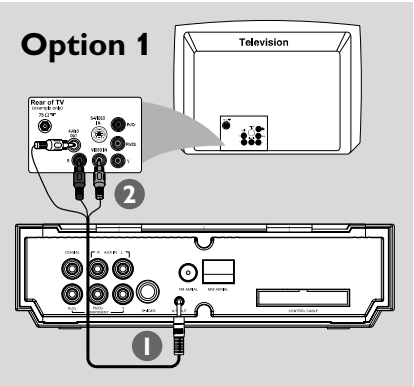
Connect the serial port marked "**CONTROL CABLE**" at the rear of the DVD player to the same port at the rear of the power amplifier with the supplied flat control cable.

Downloaded From DvDPlayer-Manual.com Philips Manuals

Step 4: Connecting a TV

IMPORTANT!
– You only need to make one video connection from the following options, depending on the capabilities of your TV.
– Connect the DVD system directly to the TV.

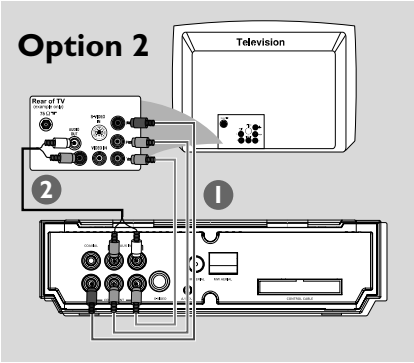
Using AV OUT jack



1. Connect the end of the supplied A/V cord with only one connector to the **A/V OUT** jack of the DVD system.
2. For the other end, connect the video output connector (yellow) to the video input jack (or labeled as A/V In, CVBS, Composite or Baseband) on the TV. To hear the sound of this DVD system through your TV, connect the audio connectors (white/ red) to the audio input jacks on the TV.

Using Component Video jacks (Y Pb Pr)

IMPORTANT!
– The progressive scan video quality is only possible when using Y Pb Pr, and a progressive scan TV is required.



1. Use component video cables (red/blue/green - not supplied) to connect the DVD system's Y Pb Pr jacks to the corresponding Component video input jacks (or labeled as Y Pb/Cb Pr/Cr or YUV) on the TV.
2. To hear the TV channels through this DVD system, use the audio cables (white/red) to connect AUX IN jacks to the corresponding AUDIO OUT jacks on the TV.
3. If you are using a Progressive Scan TV (TV must indicate Progressive Scan or ProScan capability), to activate TV Progressive Scan, please refer to your TV user manual. For DVD system Progressive Scan function, see "Getting Started-Setting up Progressive Scan feature".

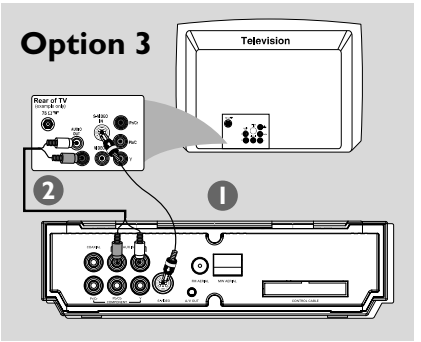
Note:
– If your TV does not support Progressive Scan, you will not be able to view the picture.
Press SYSTEM on the remote to exit the system menu and then DISC and "1" to exit progressive scan.

Downloaded From DvDPlayer-Manual.com Philips Manuals

English

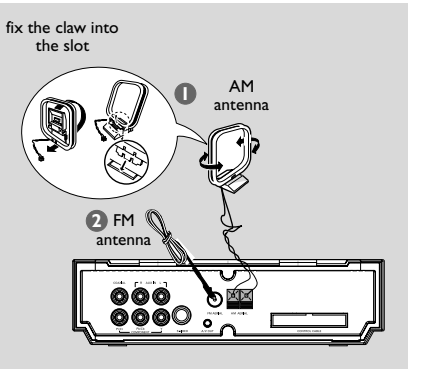
Using S-Video jack

IMPORTANT!
– If S-Video is used for DVD playback connection, the system's VIDEO OUT setting will need to be changed accordingly.

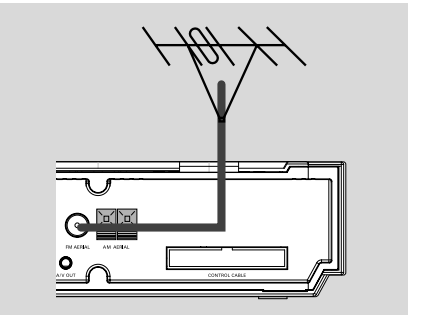


1. Use an S-Video cable (not supplied) to connect the DVD system's S-VIDEO jack to the S-Video input jack (or labeled as Y/C or S-VHS) on the TV.
2. To hear the TV channels through this DVD system, use the audio cables (white/red) to connect AUX IN jacks to the corresponding AUDIO OUT jacks on the TV.

Step 5: Connecting FM/AM antennas



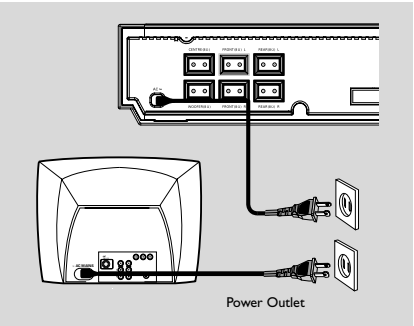
1. Connect the supplied AM loop antenna to the AM jack. Place the AM loop antenna on a shelf or attach to a stand or wall.
2. Connect the supplied FM antenna to the FM (75 Ω) jack. Extend the FM antenna and fix its end to the wall.
   For better FM stereo reception, connect an external FM antenna (not supplied).



Note:
– Adjust the position of the antennas for optimal reception.
– Position the antennas as far as possible from your TV, VCR or other radiation source to prevent unwanted interference.

Downloaded From DvDPlayer-Manual.com Philips Manuals

Step 6: Connecting the power cord



After everything is connected properly, plug in the AC power cord to the power outlet.

Never make or change any connection with the power switched on.

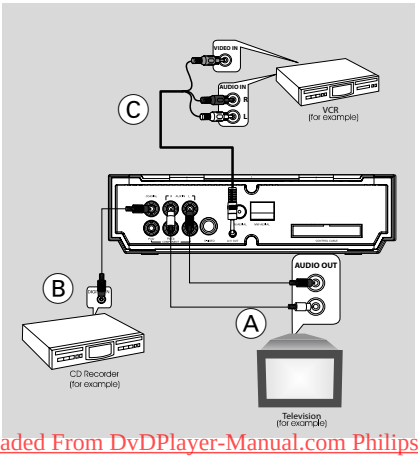
Optional: Connecting additional equipment

IMPORTANT!

– Some discs are copy-protected. You cannot record the disc through a VCR or digital recording device.

– When making connections, make sure the colour of cables matches the colour of jacks.

– Always refer to the owner's manual of the other equipment for complete connection and usage details.



Viewing and listening to the playback of other equipment Ⓐ

- Connect the system's **AUX IN (R/L)** jacks to the AUDIO OUT jacks on the other audio/visual device (such as a TV, VCR, Laser Disc player or cassette deck).
  Before starting operation, press **SOURCE** on the system to select AUX or press **AUX** on the remote in order to activate the input source.

Recording (digital) Ⓑ

- Connect the system's **COAXIAL** jack to the DIGITAL IN jack on a digital recording device (such as DTS-Digital Theatre compatible, with Dolby Digital decoder).
  Before starting operation, set the DIGITAL OUT according to the audio connection. (See "DIGITAL OUT".)

Using the VCR for recording DVDs Ⓒ

- Connect the system's **A/V OUT** jacks to the corresponding VIDEO IN jack and AUDIO IN jacks on the VCR with the supplied A/V cable by matching the connector types. This will allow you to make analogue stereo (two channel, right and left) recordings.

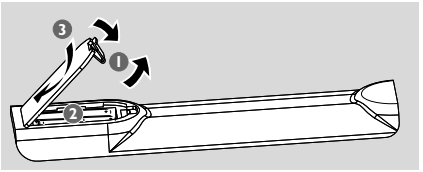
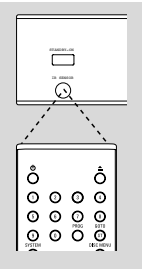
Getting Started

Step 1: Inserting batteries into the Remote Control



1. Open the battery compartment.
2. Insert two AAA batteries following the indications (+/-) inside the compartment.
3. Close the cover.

Using the Remote Control to operate the Player



1. Aim the Remote Control directly at the remote sensor (IR) on the front panel.
2. Do not put any objects between the Remote Control and the DVD Player while operating the DVD Player.

CAUTION!

– Remove batteries if they are exhausted or if the Remote Control is not being used for a long time.

– Do not use old and new or different types of batteries in combination.

– Batteries contain chemical substances, so they should be disposed of properly.

Step 2: Setting up the TV

IMPORTANT!

– Make sure you have completed all the necessary connections. (See "Connecting TV").

– In order for a DVD disc to play on this Player, the colour system of the Disc, the TV and the DVD Player should match.

1. Switch the DVD system on and then select DISC source. (See "**Switching the system on/off**").
2. Turn on the TV and set to the correct video-in channel. You should see the blue Philips DVD background screen on the TV.
   ➜ Usually these channels are between the lowest and highest channels and may be called FRONT, A/V IN, or VIDEO. See your TV manual for more details.
   ➜ Or, you may go to channel 1 on your TV, then press the Channel down button repeatedly until you see the Video In channel.
   ➜ Or, the TV Remote Control may have a button or switch that chooses different video modes.
   ➜ Or, set the TV to channel 3 or 4 if you are using an RF modulator.

Setting up Progressive Scan feature (for Progressive Scan TV only)

The progressive scan display twice the number of frames per seconds than interlaced scanning (ordinary normal TV system). With nearly double the number of lines, progressive scan offers higher picture resolution and quality.

IMPORTANT!

Before enabling the progressive scan feature, you must ensure:

1) Your TV can accept progressive signals, a progressive scan TV is required.

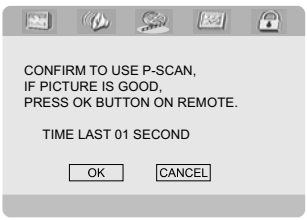
2) You have connected the DVD player to your TV using Y Pb Pr (see "Step 4: Connecting a TV-Using Component Video jacks (Y Pb Pr)".)

1. Turn on your TV.
2. Turn off your TV progressive scan mode or turn on interlaced mode (refer to your TV user manual).
3. Press **ECO POWER/STANDBY ON** ⏻ (⏻ on the remote) to turn on the DVD player.
4. Select the correct Video Input channel.
   ➜ The DVD background screen appears on the TV.
5. Press **SYSTEM**.

Downloaded From DvDPlayer-Manual.com Philips Manuals

6. Press ◀ ▶ repeatedly to select "**VIDEO SETUP PAGE**".
7. Select "**TV MODE**" to "**P-SCAN**", then **OK** to confirm.
   ➜ The instruction menu appears on the TV.

8. Press ◀ ▶ to highlight OK in the menu and press **OK** to confirm.
   There will be a distorted picture on your TV at this state until you turn on the progressive scan mode on your TV.
9. Turn on your TV progressive scan mode (refer to your TV user manual).
   ➜ The below menu appears on the TV.



10. Press ◀ ▶ to highlight OK in the menu and press **OK** to confirm.
    ➜ The setup is complete now and you can start enjoy the high quality picture.

To deactivate Progressive manually

- **When the distorted sign still appears on the TV**, it may be due to the connected TV does not accept progressive signals, and progressive is set by mistake. You must reset the unit to interlace format.

1. Turn off your TV progressive scan mode or turn on to interlaced mode (refer to your TV user manual).
2. Press **SYSTEM** on the remote to exit the system menu and then DISC and "1" to exit progressive scan.

System Menu Options

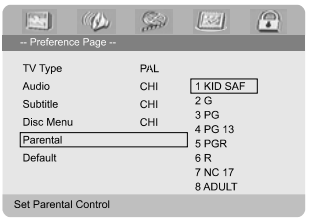
Parental

Some DVDs may have a parental level assigned to the complete disc or to certain scenes on the disc. This feature lets you set a playback limitation level.

The rating levels are from 1 to 8 and are country dependent. You can prohibit the playing of certain discs that are not suitable for your children or have certain discs played with alternative scenes.



- VCD, SVCD and CD have no level indication, so parental control function has no effect on those kinds of discs. This applies to most illegal DVD discs.

1. Press ▲ ▼ to highlight "Parental".
2. Enter its submenu by pressing ▶.
3. Use ▲ ▼ to highlight a rating level for the disc inserted.
   ➜ DVDs that are rated above the level you selected will not play unless you enter your four-digit password and choose a higher level rating.

Note:

– Some DVDs are not encoded with a rating though the movie rating may be printed on the Disc cover. The rating level feature does not work for such Discs.

Rating explanations

1 KID SAF
– Kids material; recommended especially for children and viewers of all ages.

2 G
– General Audience; recommended as acceptable for viewers of all ages.

3 PG
– Parental Guidance suggested.

4 PG 13
– Material is unsuitable for children under age 13.

5-6 PGR, R
– Parental Guidance - Restricted; recommended that parents restrict children under 17 from viewing or allow to view only when supervised by a parent or adult guardian.

7 NC-17
– No children under age 17; not recommended viewing for children under age 17.

8 Adult
– Mature materials; should be viewed only by adults due to graphic sexual material, violence or language.

Default

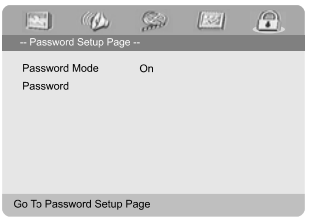
Setting the "Default" function will reset all options and your personal settings to the factory defaults and all your personal settings will be erased.

Caution!

– When this function is activated, all settings will be reset to factory defaults.

Password Setup Page

The options included in Password Setup page are: "Password Mode" and "Password".



Password Mode

This feature is used to enable/disable password by selecting "ON"/"OFF".

WARNING
Under no circumstances should you try to repair the system yourself, as this will invalidate the warranty. Do not open the system as there is a risk of electric shock.

If a fault occurs, first check the points listed below before taking the system for repair. If you are unable to remedy a problem by following these hints, consult your dealer or Philips for help.

Problem	Solution
No power.	✔ Check if the AC power cord is properly connected. ✔ Press STANDBY ON ⏻ on the top of the DVD micro system or ⏻ on the remote to turn on the power.
No picture.	✔ Check if the TV is switched on. ✔ Check the video connection. ✔ Press SOURCE on the top of the DVD player repeatedly to select "DVD" or press DISC on the remote. ✔ Set your TV to the correct Video In channel. This channel is usually near channel 00. Or, you may have a button on the TV remote control that selects Auxiliary or A/V IN channel. See your TV owner's manual for details. Or, change channels at the TV until you see DVD screen on the TV. ✔ If the progressive scan feature is activated but the connected TV does not support progressive signals or the cables are not connected accordingly, see "Getting Started-Setting up Progressive Scan feature" for proper progressive scan setup or deactivate the progressive scan feature as below: 1) Turn off your TV progressive scan mode or turn on to interlaced mode. 2) Press SYSTEM on the remote to exit the system menu and then DISC and "1" to exit progressive scan.
Distorted or poor picture.	✔ Sometimes a small amount of picture distortion may appear. This is not a malfunction. ✔ Clean the disc.
Completely distorted picture or black/ white picture.	✔ TV has a colour system standard. If the disc's or DVD system's colour system is different than your TV's colour system, the picture may be distorted or colourless.

Downloaded From DvDPlayer-Manual.com Philips Manuals

Troubleshooting

The aspect ratio of the screen cannot be changed even though you have set the TV shape.	✔ The aspect ratio is fixed on the DVD disc. ✔ Depending on the TV, it may not be possible to change the aspect ratio.
No sound or distorted sound.	✔ Adjust the volume. ✔ Check that the speakers are connected correctly. ✔ Replace the speaker cables. ✔ Disconnect the headphones. ✔ The system is in pause, slow motion or fast forward/reverse mode, press PRESET/ ▶II (or ▶II on the remote) to resume normal play mode.
The micro DVD player does not start playback.	✔ Insert a readable disc with the playback side facing down. ✔ Check the disc type, colour system and regional code. Check for any scratches or smudges on the disc. ✔ Press SYSTEM MENU to turn off the setup menu screen. ✔ Cancel the parental control rating function or change the rating level. ✔ Moisture has condensed inside the system. Remove the disc and leave the system turned on for about an hour.
The DVD micro system does not respond when the buttons are pressed.	✔ Disconnect the power plug from the outlet and insert again.
Cannot activate some features, such as Angles, Subtitles, or multi-language Audio.	✔ Multi-language sound or subtitle is not recorded on the DVD. ✔ Changing the language for the sound or subtitle is prohibited on the DVD. ✔ The features may not be available on the disc.
Considerable noise in radio broadcasts. **Sound cannot be heard or is of poor quality.**	✔ Tune in to the correct frequency. ✔ Connect the antennas. ✔ Fully extend the FM wire antenna. Position for best reception and secure to a wall. ✔ Connect an outdoor FM or AM antenna. ✔ Adjust the direction and position for best reception. ✔ Place the antenna farther away from any equipment that may be causing the noise. ✔ Increase the distance between the system and your TV or other equipment.

Downloaded From DvDPlayer-Manual.com Philips Manuals

The remote control does not function.	✔ Select the correct source (DISC or TUNER, for example) before pressing the function button. ✔ Point the remote control at the remote sensor of the unit. ✔ Reduce the distance to the player. ✔ Remove any possible obstacles. ✔ Replace the batteries with new ones. ✔ Check that the batteries are loaded correctly.
The display is dark.	✔ Press DIM again.
Low hum or buzz sound.	✔ Place the DVD micro system as far away as possible from electrical devices that may be causing interference.
Low bass response.	✔ Check all speakers for correct polarity.
Unable to select Progressive Scan	✔ Check that the output of the video signal is switched to 'Ypbpr'.

Glossary

English

Analog: Sound that has not been turned into numbers. Analog sound varies, while digital sound has specific numerical values. These jacks send audio through two channels, the left and right.

Aspect ratio: The ratio of vertical and horizontal sizes of a displayed image. The horizontal vs. vertical ratio of conventional TVs. is 4:3, and that of wide-screens is 16:9.

AUDIO OUT Jacks: Jacks on the back of the DVD System that send audio to another system (TV set, Stereo, etc.).

Bit Rate: The amount of data used to hold a given length of music; measured in kilobits per second, or kbps. Or, the speed at which you record. Generally, the higher the bit rate the better the sound quality. However, higher bit rates use more space on a Disc.

Chapter: Sections of a picture or a music piece on a DVD that are smaller than titles. A title is composed of several chapters. Each chapter is assigned a chapter number enabling you to locate the chapter you want.

Component Video Out Jacks: Jacks on the back of the DVD System that send high-quality video to a TV set that has Component Video In jacks (R/G/B, Y/Pb/Pr, etc.).

Disc menu: A screen display prepared for the selection of images, sound, subtitles, multi-angles, etc recorded on a DVD.

Digital: Sound that has been converted into numerical values. Digital sound is available when you use the DIGITAL AUDIO OUT COAXIAL or OPTICAL jacks. These jacks send audio through multiple channels, instead of just two channels as analog does.

Dolby Digital: A surround sound system developed by Dolby Laboratories containing up to six channels of digital audio (front left and right, surround left and right and center).

DTS: Digital Theater Systems. This is a surround sound system, but different from Dolby Digital. The formats were developed by different companies.

JPEG: A still-picture data compression system proposed by the Joint Photographic Expert Group, which features small decrease in image quality in spite of its high compression ratio.

MP3: A file format with a sound data compression system, "MPE" is the abbreviation of Motion Picture Experts Group 1 (or MPEG-1) Audio Layer 3. Through the MP3 format, one CD-R or CD-RW can contain about 10 times as much data volume as a regular CD can.

Multichannel: DVD is specified to have all sound tracks constitute one sound field. Multichannel refers to a structure of sound tracks having three or more channels.

Parental control: A function of the DVD to limit playback of the disc by the age of the users according to the limitation level in each country. The limitation varies from disc to disc; when it is activated, playback will be prohibited if the software's level is higher than the user-set level.

PCM (Pulse Code Modulation): A system for converting analog sound signal to digital signal for later processing without data compression.

Playback control (PBC): Refers to the signal recorded on video CDs or SVCDs for reproduction control. By using screen menus recorded on a Video CD or SVCD that supports PBC, you can enjoy interactive-type software as well as software having a search function.

Progressive Scan (P-Scan): It displays all the horizontal lines of a picture at one time, as a signal frame. This system can convert interlaced video from DVD into progressive format for connection to a progressive display. It dramatically increases the vertical resolution. A progressive scan TV set is needed to receive progressive scan output from the system.

Region code: A system allowing discs to be played only in preset regions. This unit will only play discs that have compatible region codes. You can find the region code of your unit from the product label. Some discs are compatible with more than one region (or ALL regions).

S-Video: Produces a clear picture by sending separate signals for luminance and the color. You can use S-Video only if your TV set has S-Video In jack.

Sampling Frequency: Frequency of data sampling when analog data is converted to digital data. Sampling frequency numerically represents how many times the original analog signal is sampled per second.

Surround: A system for users to create realistic three-dimensional sound fields full of realism by arranging multiple speakers around the listener.

Title: The longest section of a picture or music feature on DVD, music, etc., in video software, or the entire album in audio software. Each title is assigned a title number enabling you to locate the title you want.

VIDEO OUT jack: Jack on the back of the DVD System that sends video to TV.

PHILIPS LIMITED WARRANTY
ONE (1) YEAR

WARRANTY COVERAGE:
PHILIPS warranty obligation is limited to the terms set forth below.

WHO IS COVERED:
Philips warrants the product to the original purchaser or the person receiving the product as a gift against defects in materials and workmanship as based on the date of original purchase ("Warranty Period") from an Authorized Dealer. The original sales receipt showing the product name and the purchase date from an authorized retailer is considered such proof.

WHAT IS COVERED:
The Philips warranty covers new products if a defect arises and a valid claim is received by Philips within the Warranty Period. At its option, Philips will either (1) repair the product at no charge, using new or refurbished replacement parts, or (2) exchange the product with a product that is new or which has been manufactured from new, or serviceable used parts and is at least functionally equivalent or most comparable to the original product in Philips current inventory, or (3) refund the original purchase price of the product.
Philips warrants replacement products or parts provided under this warranty against defects in materials and workmanship from the date of the replacement or repair for ninety (90) days or for the remaining portion of the original product's warranty, whichever provides longer coverage for you. When a product or part is exchanged, any replacement item becomes your property and the replaced item becomes Philips' property. When a refund is given, your product becomes Philips' property.
Note: Any product sold and identified as refurbished or renewed carries a ninety (90) day limited warranty.

Replacement product can only be sent if all warranty requirements are met. Failure to follow all requirements can result in delay.

WHAT IS NOT COVERED - EXCLUSIONS AND LIMITATIONS:
This Limited Warranty applies only to the new products manufactured by or for Philips that can be identified by the trademark, trade name, or logo affixed to it. This Limited Warranty does not apply to any non-Philips hardware product or any software, even if packaged or sold with the product. Non-Philips manufacturers, suppliers, or publishers may provide a separate warranty for their own products packaged with the bundled product.

Philips is not liable for any damage to or loss of any programs, data, or other information stored on any media contained within the product, or any non-Philips product or part not covered by this warranty. Recovery or reinstallation of programs, data or other information is not covered under this Limited Warranty.

This warranty does not apply (a) to damage caused by accident, abuse, misuse, misapplication, or non-Philips product, (b) to damage caused by service performed by anyone other than Philips or Philips Authorized Service Location, (c) to a product or a part that has been modified without the written permission of Philips, or (d) if any Philips serial number has been removed or defaced, or (e) product, accessories or consumables sold "AS IS" without warranty of any kind by including refurbished Philips product sold "AS IS" by some retailers.

This Limited Warranty does not cover:
- Shipping charges to return defective product to Philips.
- Labor charges for installation or setup of the product, adjustment of customer controls on the product, and installation or repair of antenna systems outside of the product.
- Product repair and/or part replacement because of improper installation, connections to improper voltage supply, abuse, neglect, misuse, accident, unauthorized repair or other cause not within the control of Philips.
- Damage or claims for products not being available for use, or for lost data or lost software.
- Damage occurring to product during shipping.
- A product that requires modification or adaptation to enable it to operate in any country other than the country for which it was designed, manufactured, approved and/or authorized, or repair of products damaged by these modifications.
- A product used for commercial or institutional purposes (including but not limited to rental purposes).
- Product lost in shipment and no signature verification receipt can be provided.
- Failure to operate per Owner's Manual.
